K. RISK FACTORS RELATING TO THE DEBENTURES

- (i) Management's perception of Risk Factors

Every business carries inherent risks and uncertainties that can affect financial conditions, results of operations and prospects. Investors should carefully consider all the information in this General Information Document, including the risks and uncertainties described below, as well as the financial statements contained in this General Information Document, before making an investment in the securities. The Company believes that the following risk factors may affect its ability to fulfil its obligations under the securities issued under the Key Information Document. All of these factors are contingencies which may or may not occur and the Company is not in a position to express a view on the likelihood of any such contingency occurring.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where such implications are not quantifiable and hence any quantification of the underlying risks has not been disclosed in such risk factors. You should not invest in the securities unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your own tax, financial and legal advisors about the particular consequences of an investment in the securities. Unless otherwise stated, our financial information used in this section is derived from our audited unconsolidated financial information, prepared in accordance with accounting standards generally accepted in India.

(ii) Risk in relation to the non- convertible securities:

The following are the risks relating to the Company, the securities and the market in general envisaged by the management of the Company. Potential Investors should carefully consider all the risk factors in this General Information Document for evaluating the Company and its business and the securities before making any investment decision relating to the securities. The Company believes that the factors described below represent the principal risks inherent in investing in the securities but does not represent that the statements below regarding risks of holding the securities are exhaustive. Investors should also read the detailed information set out elsewhere in this General Information Document and the Key Information Document and reach their own views prior to making any investment decision.

Note: Unless specified or quantified in the relevant risk factors, the Company is not in a position to quantify the financial or other implications of any risk mentioned herein below:

(a) The securities may be illiquid.

The Company intends to list the securities on NSE. The Company cannot provide any guarantee that the securities will be frequently traded on the Stock Exchange and that there will be any market for the securities. It is not possible to predict if and to what extent a secondary market may develop in the securities or at what price the securities will trade in the secondary market or whether such market will be liquid or illiquid. The fact that the securities may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity. The more limited the secondary market is, the more difficult it may be for holders of the securities to realize value for the securities prior to settlement of the securities.

(b) Securities may not be a suitable investment for all investors.

Potential investors should ensure that they understand the nature of the securities and the extent of their exposure to risk, that they have sufficient knowledge, experience and access to professional advisers such as legal, tax, accounting and other advisers to make their own legal, tax, accounting and financial evaluation of the merits and risks of investment in the securities and that they consider the suitability of the securities as an investment in the light of their own circumstances and financial condition. These risks may include, among others, equity market risks, bond market risks, interest rate risks, market volatility and economic, political, and regulatory risks and any combination of these and other risks.

(c) Exercise of powers by the Debenture Trustee is subject to equitable principles and supervisory powers of courts.

The exercise by the Debenture Trustee of the powers and remedies conferred on it under the Debentures and the Debenture Documents or otherwise vested in it by law, will be subject to general equitable principles regarding the enforcement of security, the general supervisory powers and discretion of the Indian courts in the context thereof and the obtaining of any necessary governmental or regulatory consents, approvals, authorizations, or orders.

(d) The right of the Debenture Holders to receive payments under the Debentures will be junior to certain tax and other liabilities preferred by law on an insolvency of the Issuer.

The Debentures will be subordinated to certain liabilities preferred by law such as claims of the Government of India on account of taxes and certain liabilities incurred in the ordinary course of the Issuer's business

(including workmen's dues). Upon an order for winding-up in India, the assets of a company are vested in a liquidator who has wide powers to liquidate such company to pay its debt and administrative expenses.

(e) Downgrading in Credit Rating:

The Issuer cannot guarantee that the rating issued under the respective Key Information Document will not be downgraded. In the event of deterioration in the financial health of the Issuer, there is a possibility that the rating agencies may downgrade the rating of the debentures. Such a downgrade in the credit rating may lower the value of the debentures and may also result in the Issuer having to withdraw this borrowing programme.

(f) Regulatory changes may adversely affect the performance or financial conditions.

Regulatory changes relating to business segments in which the Company operates in India can have a bearing on the business. Each state in India has different local taxes and levies. Changes in these local taxes and levies may impact our profits and profitability. Any negative changes in the regulatory conditions in India or the other geographic markets could adversely affect our business operations or financial conditions.

(g) Taxation

Potential purchasers and sellers of the securities should be aware that they may be required to pay taxes in accordance with the laws and practices of India. Payment and/or delivery of any amount due in respect of the securities will be conditional upon the payment of all applicable taxes, duties and/or expenses.

Potential investors who are in any doubt as to their tax position should consult their own independent tax advisors. In addition, potential investors should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.

(h) Delays in court proceedings in India

If any dispute arises between the Issuer and any other party, the Issuer or such other party may need to take recourse to judicial proceedings before courts in India. It is not unusual for court proceedings in India to continue for extended periods. Disposition of cases may be further subject to various delays including multiple levels of appellate adjudication.

(i) Risks in relation to the security created in relation to the Debt Securities. Further, any risks in relation to maintenance of security cover or full recovery of the security in case of enforcement

In the event that the Company is unable to meet its payment and other obligations towards Investors under the terms of the Debentures, the Debenture Trustee may enforce the Security as per the terms of DTD, security documents, and other related documents executed in relation to the Debentures. The Debenture Holder(s)' recovery in relation to the Debentures will be subject to (i) the market value of such Security (ii) finding willing buyers for the Security at a price sufficient to repay the Debenture Holder(s)' amounts outstanding under the Debentures. There is a risk that the value realized from the enforcement of the Security may be insufficient to redeem the Debentures.

Where any Debentures issued pursuant to this General Information Document and any relevant Key Information Document for the relevant issuance of Debentures are secured against a charge to the tune of at least 150% of the principal and interest amount in favour of the Debenture Trustee, it shall be the duty of the Debenture Trustee to monitor that the security is maintained. The possibility of recovery of 100% of the amount shall depend on the market scenario prevalent at the time of enforcement of the security.

(iii) Refusal of listing of any security of the issuer during preceding three financial years and current financial year by any of the Stock Exchanges in India or abroad

- (viii) All covenants including the accelerated payment covenants given by way of side letters shall be incorporated in the issue document by the issuer

In issuing and maintaining its ratings, India Ratings relies on factual information it receives from issuers and underwriters and from other sources India Ratings believes to be credible. India Ratings conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security.

The manner of India Ratings factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in India where the rated security is offered and sold, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors.

Users of India Ratings ratings should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information India Ratings relies on in connection with a rating will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to India Ratings and to the market in offering documents and other reports. In issuing its ratings India Ratings must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings can be affected by future events or conditions that were not anticipated at the time a rating was issued or affirmed.

India Ratings seeks to continuously improve its ratings criteria and methodologies, and periodically updates the descriptions on its website of its criteria and methodologies for securities of a given type. The criteria and methodology used to determine a rating action are those in effect at the time the rating action is taken, which for public ratings is the date of the related rating action commentary. Each rating action commentary provides information about the criteria and methodology used to arrive at the stated rating, which may differ from the general criteria and methodology for the applicable security type posted on the website at a given time. For this reason, you should always consult the applicable rating action commentary for the most accurate information on the basis of any given public rating.

Ratings are based on established criteria and methodologies that India Ratings is continuously evaluating and updating. Therefore, ratings are the collective work product of India Ratings and no individual, or group of individuals, is solely responsible for a rating. All India Ratings reports have shared authorship. Individuals identified in an India Ratings report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only.

Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services. Investors may find India Ratings ratings to be important information, and India Ratings notes that you are responsible for communicating the contents of this letter, and any changes with respect to the rating, to investors.

It will be important that you promptly provide us with all information that may be material to the ratings so that our ratings continue to be appropriate.
